

JLG Telehandler Attachments

JLG Attachments - In the late 1960's John L. Grove, with his wife Cora set out on a cross country journey in their RV. Recently retired, after spending numerous years working with his brother to develop their crane company into an industry leader, John had no idea that momentous trip would permit JLG Industries, Inc to emerge. The world leader of mobile aerial work platforms and precision materials handling equipment was the end consequence of a road expedition.

All through their trip, John reacquainted himself with previous business connections along the way. In combination with these conversations and a noteworthy event; two workers had been tragically electrocuted on scaffolding when the Groves were passing through the Hoover Dam. John discovered a substantial market for a product that could promptly and safely elevate people in the air to accomplish maintenance and other construction functions.

Upon returning from their travels, John established a partnership with two friends and obtained a metal fabrication business in McConnellsburg, Pennsylvania. In 1970, starting operations with a crew of twenty workers, they manufactured and sold the first JLG aerial work platform. The business incorporates many of the basic design essentials of that original lift into existing designs.

Since then, JLG Forklifts have come a great distance from when Mr. John L. Grove returned from his fatefull cross-country journey and since the first JLG aerial platform entered the market. As of today, the company has extended itself into a number of global markets and continues to cultivate modern machinery to guarantee that consumers are able to become safer and more efficient within their workplace.
